

Evaluación Final - Anass

Después de abrir la carpeta del proyecto en Visual Studio, he configurado el dockerfile y .dockerignore

```
mf0493_av_final_Anass > Dockerfile > ...
1  # Imagen base
2  FROM --platform=linux/amd64 node:16
3  LABEL developer="ferran"
4
5  # Especificar el directorio de trabajo en la imagen docker
6  WORKDIR /app
7
8  # Copiar los fichero del proyecto
9  # Empezamos por los que cargan las dependencias
10 # COPY package.json
11 # COPY package-lock.json
12 COPY package.json package-lock.json ./
13
14 # Ahora necesitamos obtener los módulos
15 RUN npm install
16
17 # Copiar el directorio de la aplicación
18 # COPY /src /app/
19 COPY . .
20
21
22 EXPOSE 5000
```

```
mf0493_av_final_Anass > .dockerignore
1  node_modules
2  npm-debug.log
```

Luego he logueado con Docker login y creado imagen con docker build

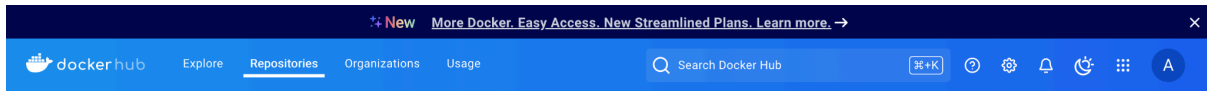

```
(base) anasselguennouni@Anass-MacBook-Pro mf0493_av_final % docker build -t anass-game:dope .
